

Our Intention to be a Future-Fit Business

We recognize the crucial role every business must play in creating a Future-Fit Society – one that is environmentally restorative, socially just and economically inclusive – and we are committed to playing our part.

We aspire to become Future-Fit Business because we believe that our long-term success is tied to the value we provide to society. That means we must eliminate all of the potential negative impacts associated with what we buy, what we sell, and what we do.

Example of an additional paragraph focused on company-critical issues:

In particular, as a pharmaceutical business most of our products today rely on the use of single-use plastics, many of which cannot be recycled. This is an industry-wide challenge and we commit to doing all we can to eliminate it.

In addition, we will seek to create positive impact wherever we can, to speed up society's transition to future-fitness through our own actions and by assisting others on the journey.

Example of an additional paragraph for any company-specific positive impacts:

In particular, as a pharmaceutical business we sell life-saving medicines at marginal cost to communities that would otherwise struggle to access them.

We acknowledge that incremental improvement of the status quo isn't enough, so we intend to transform the way we do things. We will lead by example and encourage other businesses to do the same by sharing our progress annually.
